

## All of the success - none of the risk!

With exceptional and continuing success over 10 years, **award-winning** and now widely recognised as a market leader, 123insight outperforms the market and competition.

123insight revolutionises ERP/MRP system selection and implementation, avoiding completely the multiple pitfalls associated with traditional system adoption. A large and rapidly growing customer base testifies to this and covers the full spectrum of manufacturing, from small start-ups to companies with over 800 employees.

Our customer case studies illustrate the diversity, where the challenges resolved may reflect many of the same issues and concerns that you yourself are facing today!

## So what can 123insight do for you?

Unprecedented **visibility and control** provide operating efficiencies, predictability and facilitate planning for a more successful business with a **rapid return on investment**.

**Implementation is measured in days and weeks**, with none of the extended training and consultancy normally associated with a MRP/ERP implementation – just a few days of training and no consultancy.

The 123insight Evaluation Workshop reduces selecting an ERP/MRP system to just 2 ½ hours whilst entirely removing the risk of making a mistake in selection.

123insight also utilises the latest .NET Microsoft technology for best possible reliability and serviceability.

## You simply can't get it wrong with 123insight!

Following an Evaluation Workshop, full system training is offered with 'no obligation' – where you only pay for the training when you decide to proceed. So you know absolutely everything, down to the last detail, before any kind of commitment is made.

**Sounds too good to be true?** It did to Cobra UK Automotive. Here's Nick English, Operations Director:

*"We were very impressed with what 123insight offered but we were also quite sceptical. The offer of only paying for the training if we took up the system seemed to be too good to be true – we were looking for the catch, but actually there isn't one."*

And Cobra were up and running in 2 ½ weeks without making a single support call!

## The 123insight approach – unique and totally transparent

That we are always polite goes without saying, but we are also exceptionally open and honest in our customer relationships – there's actually no choice in a situation where on-going commitment is totally built on trust!

Manufacturers know more about the unique factors that drive their business than anyone else. 123insight provides the tools that empower management to be able to do its job more efficiently, and also self-sufficiently – without the interference, disruption and illusory comfort that characterise the traditional approach.

We show the software in the most simple, straightforward and accessible way possible. **Customers do not pay a penny until they have completed full training and are ready to implement.**

Even then, there is no binding contract – just a straightforward, fully inclusive, flexible and predictable, low monthly rental, cancellable anytime. And you have the added assurance that if for some reason 123insight does not meet your particular needs, we'll tell you, because, given our business model, supplying would then be pointless for both parties.

## When can I attend an Evaluation Workshop?

123insight Evaluation Workshops are run regularly at various locations throughout the UK, Northern Ireland and the Republic of Ireland and **last just 2 ½ hours.**

Some of the venues are at Universities, Further Education Establishments and occasionally Business Links where all of these organisations invite contacts from their local manufacturing community to attend our Evaluation Workshops as part of their business support activities.

Details of dates and venues are provided on our website at [www.123insight.com](http://www.123insight.com), where you can also make your booking – or simply call us on **01489 860851** to find out more.

**Award-winning software for over a decade.**
